

**50107-G-01 thru 50107-G-10  
GROUND FAULT MODELS**

- Ideal for preventative maintenance
- Will indicate ground faults and electrical leakage while the equipment is in operation
- Measures leakage current directly and locates faults
- Prevents shutdown time
- Tests without load interruption
- The unit is also excellent for checking splices for leakage
- Operates on single-phase and three-phase networks
- Use on a single cable or a bundle
- Clamps easily onto any size conductor (Choice of Jaw openings - 2½", 3½", 4½", 6", 9")
- Convenient one-hand operation
- Maximum operating temperature range -5°F to +150°F (-20°C to +65°C)
