

## **PEAK-HOLD MODELS 50108-G-01 thru 50108-G-04**

- Accurate, well damped movement
- Hang on conductor, freeing operator's hands
- Peak hold for ease in reading maximum current after unit is removed from conductor
- Maintains the reading and is designed to measure currents in AC lines without interrupting service
- The unit is insulated for 750-volt service
- Clamps easily onto any size conductor (Choice of Jaw openings - 2½", 3½", 4½", 6")
- Rugged, tool box carrying case
- Positive, convenient selector switch
- Safety style trigger
- 500 Amp maximum continuous duty
- Easy to replace 9-volt battery in handle
- These units can be made as digital units!
- Maximum operating temperature range -5°F to +150°F (-20°C to +65°C)
