

**MODEL 50128-G-02
DRAIN TOOL WITH A RESISTOR**

- STB Drain Tool is sturdy, lightweight and easy to use
- Approximately 28 inches in length
- Ground cable length can be customized per the customers need
- This unit has a resistor attached for extra safety
- Designed to drain the voltage capacitated lines or other voltage retaining sources after the lines have been de-energized
- Lines should be checked with a voltage detector after the lines have been de-energized before and after the Drain Tool is used to make sure the voltage has been drained off
- Not designed for continuous use and should not be left on lines when they are energized
- Always wear the proper protective insulated gloves while using this unit and when working on or around high voltage

**CAUTION: THIS TOOL SHOULD NOT
BE USED AS A GROUNDING DEVICE,
IT IS FOR DISCHARGE ONLY!**
